How to choose an electrician in Jersey

Jersey doesn't have the UK's Part P, but it has its own version under the Building Bye-laws, and Jersey Electricity has rules of its own. These are the checks that matter here.

Look for NICEIC or NAPIT

For most new electrical work, such as a rewire or a new circuit, Jersey's Building Bye-laws need the work [inspected and tested by someone on an approved competent person scheme](#). In Jersey those schemes are NICEIC (and its sister scheme ELECSA) and NAPIT. The scheme notifies the building department for you.

If your electrician isn't registered with one, you'll need to make a building application yourself. Small jobs, like replacing a socket or making a repair, don't need notifying, but you should still get a certificate.

Adding load? Jersey Electricity needs to know first

An EV charger, new electric heating or a power shower adds load to your supply. Your electrician sends Jersey Electricity an [Electricity Supply Enquiry](#) before work starts, and Jersey Electricity has to approve it before extra heating or hot water load is connected.

Solar panels are approved before they go up

Unlike in the UK, Jersey Electricity [approves a solar system before it's installed](#). The installer fills in its embedded generation form before work begins, and Jersey Electricity then inspects the system and fits an export meter.

There's no government grant for solar in Jersey. Jersey Electricity [notes](#) there are no subsidies like the UK's old feed-in tariffs.

Grants for EV chargers and electric heating

The [Electric Vehicle Charger Incentive](#) pays £700 towards a smart charger, one per home. A Jersey electrician registered with NICEIC or NAPIT applies for it, and it has to be approved before the charger is fitted.

Replacing an oil or gas system with electric heating, such as an electric flow boiler, storage heaters or panel radiators, can qualify for up to £4,000 from the [Low Carbon Heating Incentive](#).

Get a written quotation

Jersey Trading Standards [advises](#) asking for a quotation, which is a fixed price, rather than an estimate, and checking the terms before you agree. The [Supply of Goods and Services \(Jersey\) Law 2009](#) requires the work to be done with reasonable care and skill, and the free Consumer Advice Service on 01534 448160 can help if it isn't.

Listings are free and in alphabetical order. Jersey Web is not connected with these businesses unless a listing says so: check details with each business before you book. Guidance checked 1 October 2026.

Run a Jersey business?

Get your business listed free, or let us build you a website: builds from £100 and hosting from £20 a month.
