

— FREE GUIDE FOR JERSEY BUSINESSES

Website hosting for Jersey businesses, from £20 a month

Your website on Google Cloud servers in London, kept secure, backed up and updated by us. No setup fee and no long contract.

Hosting is the part of a website nobody notices until it fails. It decides how quickly your pages load, whether your site stays online, and whether an expired certificate or an unpatched plugin turns into a warning message for your customers.

WEBSITE HOSTING IN JERSEY

Website hosting for Jersey businesses, from £20 a month

Your website on Google Cloud servers in London, kept secure, backed up and updated by us. No setup fee and no long contract.

From £20 · No setup fee. No long contract. · Prices confirmed in writing before you commit · jerseyweb.je/services/web-hosting-jersey/

Hosting is the part of a website nobody notices until it fails. It decides how quickly your pages load, whether your site stays online, and whether an expired certificate or an unpatched plugin turns into a warning message for your customers.

Our hosting costs from £20 a month. Your site runs on Google Cloud infrastructure in London, with an SSL certificate, backups, security and updates looked after for you. The build is priced separately, from £100 depending on the job, so hosting is the only regular cost.

WHO IT'S FOR

Jersey businesses that want a fast, secure site, one clear monthly price and a real person to contact.

Why it matters

Fast where it counts

Your site is served from Google Cloud servers in London, on Google's own network. Speed also depends on how a site is built, so the two are worth judging together.

Secure by default

An SSL certificate on every site, plus the updates and security work that keep it trustworthy. You do not have to track renewals or patches.

Clear pricing, no surprises

From £20 a month covers the lot. No setup fee, no long contract, and you keep your domain and your content.

WHAT'S INCLUDED

- ☐ Hosting on Google Cloud servers in London
- ☐ SSL certificate included
- ☐ Automatic backups
- ☐ Security and software updates
- ☐ Ongoing maintenance
- ☐ A real person to contact for changes
- ☐ No setup fee and no long contract
- ☐ Your domain and content stay yours

How it works

1 Apply for your website

Tell us about your business and what you need. We confirm what is included and the price for the build.

2 We launch it on our hosting

We set up the hosting, SSL and backups, then take your site live. The hosting fee (from £20 a month) starts from launch.

3 We look after it

We keep the site secure, backed up and up to date. When you want something changed, you ask and we do it.

What hosting has to do with being found on Google

Google measures how quickly real visitors can see and use your pages, and reports it as Core Web Vitals. Speed is one signal among many, and it will not rescue a page with nothing useful on it. It does matter at the margin, and a slow site loses visitors before they read a word.

Hosting sets the floor. Slow servers cannot be hidden by a well-built page, and a well-built page cannot be rescued by fast servers. Both need to be right, which is why we look after the build and the hosting together.

Reliability counts too. If Google finds your site down or returning errors, it may drop pages from results until they recover, and an expired certificate shows visitors a full-page warning. Managed hosting exists to stop both. For the wider picture, our [guide to local SEO in Jersey](#) covers what else helps customers find you.

Common questions

How much does website hosting cost in Jersey?

Hosting with Jersey Web is from £20 a month, with no setup fee and no long contract. When you compare hosting elsewhere, check whether security, backups and updates are included, and whether the price rises after the first year.

What does the hosting fee (from £20 a month) cover?

The servers your site runs on, an SSL certificate, backups, security, updates and ongoing maintenance, plus a real person to contact when you want a change. A domain name is separate: a .je is £49 a year direct from the registry, and registrars set their own prices.

Is web hosting free?

No. Hosting is a running cost for every website, whoever builds it. Ours is from £20 a month, and the website build is priced separately, from £100 depending on the job.

Where are the servers?

Your site runs on Google Cloud infrastructure, on servers in London.

Is there a contract?

There is no long contract. You own your content and your domain.

Is my website backed up?

Yes. Backups are part of the hosting, so a mistake or a faulty update can be put right.

How fast will my website be?

Speed depends on the hosting and on how the site is built. Hosting on Google Cloud gives a strong base. As an example, real visitors on phones to the West Hants Bridge School site see the main content in about 1.3 seconds, and all three Core Web Vitals are rated good (Google Chrome UX Report, September 2026).

Talk to us about your website

Builds start from £100 depending on the job, and hosting is from £20 a month. We confirm your price in writing before you commit.
